

VNC connect

Subscription Feature Summary

VNC Connect is designed to address a range of remote access and control requirements for business and personal use. Customers can choose from a Home subscription, Professional subscription or an Enterprise subscription, each with different features, capabilities and price points.

The VNC Connect Home subscription is available free of charge for personal, non-commercial use and is limited to support for five remote computers. The annual cost of the use of the Professional and Enterprise software is based on three variables: the selected subscription, the computer tier (number of remote computers), and the length of the subscription contract (1, 3 or 5 years).

The matrix below summarizes the key features and capabilities available in the Home, Professional and Enterprise subscriptions.

	Home	Professional	Enterprise
Software licensed for commercial use	No	Yes	Yes
Seamless cloud-based connectivity	✓	✓	✓
128-bit AES session encryption	✓	✓	✓
Password authentication	✓	✓	✓
